

MONEY SPELL

With troubles around the world at the moment I have had a number of requests for a money spell. In the book "[Cast Real Spells](#)" I discuss the basics of money magic and everything in there about setting your intention applies doubly to money magic.

That said, there are so many approaches to money magic- indeed entire books have been written on this one topic alone and they're still not close to exhausting the subject.

This spell I designed to bring a boost to your finances, perhaps a surprise bonus, prize draw win, of unexpected gift. Something of that nature. It is not designed to fix long standing money issues, nor will it work well for someone who has a history of financial problems who has not yet dealt with their personal issues with money.

Treat it as a bit of fun and cast it playfully, then forget about it. Your windfall is on its way.

Preparation

Take a while to imagine how it will feel to receive your extra cash, what you might do with it. Focus on what mood you will experience, how that mood would actually feel if the money were yours already. What sensations would you feel? How does the money look in your purse or wallet? What does it smell like? Is it new and crisp? Or has it seen some action and got a bit dog eared and soft? Remember a time when you had more than enough money. How did you feel then? If this has not been the case, if you've never had any extra, imagine what that must feel like. Create a symbol that represents all this to you (see page 15 in either edition). Draw this symbol on a piece of green paper in gold ink.

Setting

If you like ritual, you can perform this spell in a circle (see page 22 in both digital and

paperback editions). Unless you are already working with a symbolic system I would recommend a light incense (often solar) and gold or deep yellow candles.

Setting (for use without a circle)

If you prefer to stay away from full blown magic circles, I would recommend that you create some kind of “barrier” for this one. You are going to be raising energy from some lively Gods so you need something to contain it. There's no need for the complete circle, but it won't harm to imagine a sphere of light springing up around you to contain the power you are going to raise until you are ready to release it.

Opening

Start by stating your intent to create a windfall of cash safely, and with harm to none.

Remember a time when you had plenty of extra cash (this is where your preparation comes in). Create that feeling now. Remember the sensations of excitement, satisfaction, confidence etc.

Heart of the Spell

Focus on the symbol you prepared earlier. Imagine you can hear a humming sound in the distance. Start to chant, “Shac, shac, shac,” etc. Look ahead and see a small sphere of gold light approaching you. This is the source of the sound. As it gets nearer and bigger the sound gets louder. Eventually, it enters your circle and I want you to visualize it being compressed into a tiny sphere of concentrated energy as you press it down into the symbol you have drawn. Keep chanting all the time.

At some point you will suddenly feel that you have done enough. You will know when that is. Stop chanting, thank the Gods of prosperity for their help, and clear your circle if you have one.

The author and publisher of this work have over 38 years experience in magic and have made every effort to produce an accurate and useful guide to magical practice. It is quite likely that the authorities where you live do not believe in magic (for example - recent amendments to UK law mean that this product is offered for entertainment value only and no magical results can be guaranteed) and therefore it is necessary to state: This guide is produced to the best of the ability of the author. Magical practice is necessarily experimental, so results cannot be guaranteed. You must satisfy yourself as to the legality and safety of any practical work you undertake.

As much spell casting uses candles, incense, and other hot materials, please make sure you take adequate fire precautions. We want you to come back and buy our other products, not lie in a hospital bed with severe burns. Magicians are often portrayed with cowled robes and flowing sleeves etc. Whilst this can look really impressive, remember FIRE will destroy any cool you have if you wave those sleeves too near the candles or joss sticks.

You know what I'm trying to say here. Modern legislation practically requires me to remind you to keep breathing whilst performing magic. Be careful. Be safe.
